

**FOREST**

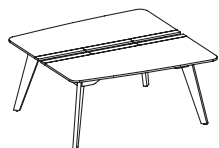

“FOREST” office furniture series is designed for those who enjoy a creative and inspiring work environment or simply work from home. “FOREST” furniture is particularly suitable for open offices without a clear separation of work and recreational space, where employees often change their workplace and where the meeting rooms and conference zones are cosy and informal.

The series is comprised of two types of desks (standing and sitting desks), drawer units of varying dimensions and types, as well as cabinets and conference tables, all designed to create a complete and harmonious interior.

Designed by Rimvydas Bartkus *R Bartkus*
